Arthur Bueno Neto, Software Developer

Experienced Senior Software Engineer skilled in React Native, TypeScript, and project leadership. Proven success in enhancing app functionality and improving communication systems.

Employment History

Software Engineer at Yours Bank

July 2022 — January 2024

At Yours Bank, I lead the financial education app team. I'm responsible for ensuring code quality by approving pull requests (PRs), implementing new features, overseeing the CI/CD process, participating in meetings with other departments like UI/UX and backend developers, creating tests, and various other tasks.
Technologies: React Native, Typescript, Redux,Redux Saga, ContextAPI, Hooks, styled-components, Firebase, etc.

Software Engineer at yours/dev

September 2021 — September 2022

At yours/dev, I worked on two different projects where I could participate developing a React Native marketplace app, being responsible for introducing new features that enhanced user experience and drove increased user engagement.
I also worked in an internal project using React, creating a new system to help developers in planning poker.

Software Engineer at 2Talk

February 2022 — June 2022

At 2Talk, I was part of a white-label project in React Native where we developed a VOIP communication app.
Technologies: VOIP, Typescript, React Native, Redux, styled-componentsAt 2Talk, I was part of a white-label project in React Native where we developed a VOIP communication app.
Technologies: VOIP, Typescript, React Native, Redux, styled-components

Software Engineer at TecBan

October 2020 — October 2021

At Tec Ban, I created and managed an internal app using React Native to improve internal communication. The app was designed to check ATM sensors, monitor the status of parts that needed replacement, allow communication through chat with the support center, display graphs, and more.
I also helped the team in our web application, creating and maintaining some features.
Technologies: Typescript, Javascript, React Native, ContextAPI, styled-components, HTML, CSS, Bootstrap, Laravel, PHP.

React Native Developer at Atlantico Digital

July 2020 — October 2020

At Atlântico Digital, I started and set up an internal project in React Native for the company's clients. The goal was to make it easier for them to access information about employees, taxes, invoices, absences, and other related details.
Technologies: Javascript, React Native, Redux.

Web Development Intern at DNX

March 2020 — July 2020

At DNX Soluções, I worked as a front-end intern, assisting in the creation of responsive templates, maintaining existing templates, and handling API calls.

Skills: JQuery · C# · HTML5 · CSS · JavaScript

Education

Internet Systems, UNINOVE, São Paulo

May 2021 — December 2023

Systems for the Internet trains professionals to design, develop, and install databases, web pages, and computer programs
